Recall Or Impeach

Perjury on the part of Frank L. Wildes, receiver of the State Bank and Trust company, and also on the part of District Judge Frank Langan, appears to have been committed, according to the startling evidence placed before the assembly yesterday by Assemblyman Kellher of Tonopah. Wildes declared that he had devoted his entire time to the conducting of the affairs of the receiver's office when asking for an order allowing him \$10,000 yearly salary, and the court in ruling also declared that the sum of \$10,000 appeared reasonable as the entire time of the receiver was occupied in the performance of his duties.

What a farce.

The startling discovery that Wildes had drawn a salary of \$166 monthly for 16 months from the state, after his appointment as receiver of the defunct bank, comes as a fitting climax to the disgraceful condition that has long been tolerated. Wildes drew a salary from both the state and from the bank. He could not serve two masters at the same time, nor could he have earned the salary received from the state if, according to his statement and also the statement of Judge Langan, "he devoted his entire time to the bank receivership."

Judge Langan committed a breach of public trust in allowing such a salary to his appointee while said appointee was under salary to the state, and it should be the duty of Langan to immediately submit a ruling rescinding his former order. In addition, it should be the duty of the court to immediately remove Wildes from the office he now holds, and in his stead appoint a man whose honesty and integrity is not doubted.

The immediate recall of Judge Langan, or his impeachment, should also follow as soon as the law will permit such action. The Bonanza contends that Judge Langan is not a fit person to occupy the bench of a district court, for by the disclosures as made yesterday, his inability to protect the depositors of the long defunct bank is clearly shown. It is within the power of the legislature to impeach Langan, and this action should be taken without delay. Furthermore, the impeachment of the jurist should precede the appointment of a successor to Wildes, for by this action the depositors can only be assured of a receiver who will protect their interests.

Judge Langan has not performed his duty in a manner that would protect the interests of the defunct bank's creditors. Had he done so he would have ordered the initial report of Wildes forwarded to the depositors, instead of being destroyed after being printed. The court knows of the disappearance of the reports for the matter has been given publicity, not only in the Bonanza, but in the Goldfield Tribune and also in the Reno Journal, in addition to other state papers. The matter has been discussed broadcast. It is common talk all over the state. And yet Judge Langan has remained inactive.

Whatever the motive may be that lies behind the inactivity of Judge Langan can only be surmised, and to the mind of those interested in the affair it is hinted only a source of revenue could account for the manner in which Langan tolerated the slipshod methods of Wildes.

Going To Extremes

The state senate has passed a measure amending the gambling law legalizing the playing of draw poker, keno and allowing Paris mutuels. That portion of the bill permitting draw poker and keno is all right, but the assembly should make a stand and amend the measure so as to eliminate the Paris mutuels proposition. Should the bill in its present form become a law, the result will prove more harmful than had open gambling of every variety been restored.

The Paris mutuels mean that pool rooms will be reinstated and that results of horse racing from all over the globe will be received and bet placed on the favorites. It is an easy matter for the bookmaker to keep practically 50 per cent of the wagers placed in the mutuels without the winners being the wiser. It simply calls for the performance of a few tricks, and there can be absolutely no dispute. The bookmaker is safe and the person who makes the bet can take the small amount allotted him if he happens to win.

The reinstatement of pool rooms will mean that the younger generation, children of but little experience, will be afforded an opportunity to gamble. There has never been a pool room conducted in this county but what half of the patrons were youths. It is a game of this kind that serves to inculcate the gambling passion into the minds of the younger generation.

As to the reinstatement of draw poker, the Bonanza favors the passage of the portion of the bill that calls for such action. Poker will be played, no matter to what extremes the law may go. There is no police officer in the country enforce the law. Attempts have been made in

Nevada to enforce such a law, but the results have proved disastrous to the taxpayers, as witness the recent cases in Tonopah. After the county had been put to a great expense the defendants were dismissed, owing to the inability of the prosecution to secure a conviction. Similar results have been experienced in other counties.

No attempt was made to reinstate stud poker and it is doubtful if such action will be made. The playing of stud poker allows a handsome "rakeoff" for the dealer, while in straight draw poker, the American game that has withstood the innovations of the past century, there will be no "rakeoff" or commission for the house in which the game is conducted. There is an even break for everybody and the player with the most skill or nerve will win the pots.
